- > “All things are systematised in each other both inwardly and outwardly,
- > And therewith represented by each other both in similarity and in difference.”
- > — The single axiom that is not a problem awaiting resolution,
- > but the eternal, double-voiced engine of reality itself.

This repository is the living extension of the definitive foundational paper

****A Non-Closural Process Ontology v6.6-final (07 Dec 2025)****

And its companion physics papers. It contains the core texts, formal mathematics, phenomenological exploration, and growing applications to physics, quantum gravity, biology, and ultra-efficient recursive AI.

Core Vocabulary Translation Table

(Metaphysics ↔ Measurable Physics)

Metaphysical / Ontological term	Exact Physical / Geometric / QG Equivalent
Primary Domain(s)	
-----	-----
-----	-----
Reciprocal Wound (90° crossing)	Orthogonal commutators ([x,p], Riemann tensor, inertia/viscosity)
QM, GR, Navier–Stokes	
Same / Diff / Form / Force	Ground Excited Metric Field
Quantum optics, GR metric	
Soul / Cut / World / Event	Coherent Excited Contracted Cascade-collapse
Laser coherence, neck-pinching, emission	
Edges (stasis)	Superposition, classical metric, fixed points
Density-matrix diagonals, flat spacetime	

| Diagonals (lawful pulse) | Transitions: excitation→emission, neck-
pinching→smoothing | Stimulated emission, Ricci surgery |

| Cut → World | Positive curvature → singularity (contraction) | UV
divergence, black-hole formation |

| Event → Soul | Negative curvature → expansion/coherence (return) |
Post-surgery smoothing, IR fixed point |

| Claws (recursion) | Renormalization flow, Ricci surgery, tensor-network coarse-
graining | Asymptotic safety, turbulence |

| Closure gap $\Delta = \det G - (\text{tr } G)^2/4$ | Purity gap $\text{Tr}(\rho^2)-1$, curvature deviation, entropy deficit
| QM, Ricci scalar |

| $\dot{\Delta} = 4\Delta^3$ (runaway) | Quadratic Ricci runaway, entropy production, cubic
non-linearities | Ricci flow, turbulence, mean-curvature flow |

| Primitive scale-invariant agency | Endogenous self-maintenance (Levin's planaria,
solitons, RG fixed points) | Biology, QFT, tensor networks |

Current Extensions & Applications

- Quantum gravity (asymptotic safety, tensor-network RG, matrix models)
- Black-hole thermodynamics and singularity resolution via Ricci surgery
- Biological agency (Michael Levin-style basal cognition)
- Ultra-efficient recursive AI architectures that refuse dogmatic closure

Roadmap

- Q1 2026 → Public Jupyter/SymPy notebooks simulating the matrix flow
- Q1 2026 → Empirical test protocols (laser coherence, turbulence data, black-hole analogue systems)
- Q2 2026 → First arXiv preprints of the physics companions
- Ongoing → Open collaboration (issues, pull requests, co-authorship welcome)
